the 1990s, the number of people in the UK who are employed in the public sector has increased from 10.5 million to 12.5 million (12.5% of the population).

There are a number of reasons for this increase. One is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

Another reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A third reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A fourth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A fifth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A sixth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A seventh reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

An eighth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A ninth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A tenth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A eleventh reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

A twelfth reason for the increase is that the public sector has become a more important part of the economy. The public sector has grown from 10.5% of the economy in 1990 to 15.5% in 2000. This is due to a number of factors, including the fact that the public sector has become a more important part of the economy.

the 1990s, the number of people who are employed in the service sector has increased in all countries. In the Netherlands, the service sector has grown from 50% in 1980 to 70% in 1998.

There are two reasons why the service sector has become so important. First, the service sector has become more important because of the increasing demand for services. Second, the service sector has become more important because of the increasing demand for services from the public sector.

The increasing demand for services from the public sector is due to the increasing demand for services from the elderly. The elderly are becoming more dependent on the public sector for services, and this is leading to an increase in the size of the public sector. The public sector is becoming more important because of the increasing demand for services from the elderly.

The increasing demand for services from the elderly is due to the increasing life expectancy. People are living longer, and this is leading to an increase in the number of elderly people. The elderly are becoming more dependent on the public sector for services, and this is leading to an increase in the size of the public sector. The public sector is becoming more important because of the increasing demand for services from the elderly.

The increasing demand for services from the elderly is due to the increasing life expectancy. People are living longer, and this is leading to an increase in the number of elderly people. The elderly are becoming more dependent on the public sector for services, and this is leading to an increase in the size of the public sector. The public sector is becoming more important because of the increasing demand for services from the elderly.

The increasing demand for services from the elderly is due to the increasing life expectancy. People are living longer, and this is leading to an increase in the number of elderly people.
